Free Courses For Trade Union Reps on 'Air Pollution – Southampton 28 September & Birmingham 19 October:

To: All Branches

Dear Colleagues,

This is just a short reminder that the Hazards Campaign and Greener Jobs Alliance have asked us to circulate to Health & Safety Reps.

As you know the CWU/HQ Health, Safety & Environment Department works closely with and supports both organisations.

Please see attached LTBs 331/18 and 332/18.

Hazards Campaign and Greener Jobs Alliance are jointly organising further half day briefings on Air Pollution which are aimed at Trade Union Reps but [are](#) open to others who are interested in the event. The sessions will begin with speakers from the Greener Jobs Alliance and Hazards Campaign and will examine why air pollution is both a workplace issue and a public health one. You will find out about air pollution busting citizen science techniques and create action plans to deal with workplace exposures. It will be an opportunity to share experience, knowledge and ideas.

Hazards Campaign and Greener Jobs Alliance have delivered a number of these short courses so far, e.g., in Manchester, Leeds and London which were all well received and over-subscribed. The next two are:-

Southampton Friday 28 September 1-4pm

Birmingham Friday 19 October 1-4pm

If any Reps wish to attend please contact Janet Newsham ASAP on Tel 0161 6367558.

Yours sincerely

Dave Joyce
National Health, Safety & Environment Officer
