3rd International Edition SUSTAINABILITY AND INNOVATION: **5.0** CITY AND TOURISM

9 | 10 November

Palacio de la Exposición
Carrer de Galícia, 3,
46010 València

3 MAIN THEMES

1.

**CLIMATE CHANGE, ENERGY,
ENVIRONMENT, MOBILITY,
DECARBONISATION, WASTE
TREATMENT, AIR QUALITY**

Descarbonisation

How can cities can reduce their carbon emissions while improving connectivity and quality of life for citizens?

Energy

What are the new sources of clean energy? Hydrogen at the heart of the debate - optimised production/management of resources and energy.

How should we produce and consume cleaner energy, more sustainable raw materials and materials: water quality, circular economy, biomass, hydrogen and air quality.

Water quality, circular economy, biomass, hydrogen/air quality.

Mobility

How to move without carbon impact without reducing the comfort of users and have a more inclusive transport offer. New mobility solutions: e.g shared mobility

2.

**CIUDADANO, INCLUSIÓN, CULTURA Y
PATRIMONIO, GOBERNANZA**

¿What kind of **governance** is needed to to **stimulate innovation** that responds to major climate challenges by integrating stakeholders?
How to give citizens a greater role in the democratic process and include them in decision-making?

What **digital policies and solutions** are needed to digitise, process, analyse and store the data needed to manage the city?

The '**data economy**', where IoT, Big Data and IoT, Big Data and Artificial Intelligence, robotics Artificial Intelligence, robotics, nanotechnology nanotechnology, quantum computing quantum computing, blockchain and biotechnology, the undisputed driving forces of this revolution

3.

**VIVIENDAS, ECO BARRIOS,
CIUDAD, ÁREA METROPOLITANA,
AGRICULTURA URBANA**

Viviendas y eco barrios

Housing and eco-neighbourhoods
How to reconcile the challenge of urban densification with the need and the need and demand for nature in the city?
Nature in the city and biodiversity

Urban agriculture - smart building

What place for residential, industrial and tertiary buildings with the aim of optimal and sustainable integration into the city?
Smart building - Intelligent buildings to help reduce resource consumption and optimise the use of building materials - New models of urbanism - Recyclable materials - New models of urbanism - Recyclable materials

Local trade and revitalisation of city centres:

How to encourage the maintenance of local trade and the revitalisation of town centres? Fair and accessible trade?
Connected Housing, sustainable and circular housing, shared housing and more..

3rd International Edition SUSTAINABILITY AND INNOVATION: 5.0 CITY AND TOURISM
