

**Creating
Our Future is a
Government of Ireland
campaign to
stimulate a national
conversation that
generates ideas from
the public to inform
the direction of
research in Ireland**

**A National Conversation
on Research in Ireland**

While we might not always think about it, research and innovation affect nearly every part of our lives.

The COVID-19 pandemic in particular has shown the importance and value of research and innovation in our lives – medically, socially, politically and economically.

Ideas are the starting point for all research and innovation.

Anyone, anywhere can have an idea that inspires research and innovation. It could be based on an opportunity or challenge that someone has identified in their own life, for their community, for Ireland or for the world. Or it could be based on a topic that someone is curious or passionate about.

Creating Our Future wants to hear them all – whatever facet of life they relate to.

Until the end of November, we'll be reaching out to engage people, groups and communities in a national roadshow and virtual events as well as encouraging other organisations to join and contribute to this national conversation on research and innovation.

All ideas will be captured, shared, and will help inform the future direction of research and innovation in Ireland.

For more information, and to submit your ideas, please visit our website.
